Journal # 3

Currently, our country faces many challenges and issues, particularly with the latest issue on flood control and related ghost projects. Every time I scroll down on my social media platforms like Facebook or TikTok, I see a lot of news about it, which makes me feel angry and disappointed due to its unfairness for us Filipinos, considering that most of the things in our country have taxes. From income tax, VAT and other taxes, how can we attain true progression if couldn't eliminate corruption in our country instead of using the money of the people for projects such as flood control, education, health care and other benefits instead, it is used right away to the pockets who just used the people's money for their own gain. I really ask for divine guidance or even an intervention from God on how to fix up the mess on corruption in our country so that people could be able to have true progression and opportunity which will help all of us to have a good quality of life which the government should give. I think to achieve that, it should start in our generation to be an instrument of God to advocate people on what is the right characteristic of a leader which we should vote for not just on the national level but also in the local government. I believe that God has a plan in our country even it looks hopeless and unclear for us Filipinos on what is happening in our country right now, still God has a better plan and we should believe to Him similar on how Samuel listened and believed Him and so for us we should act up on what God wants us to do for the betterment of our country.
